

# Crayon Bark Rubbings

*Recommended ages - all ages!*

*Discover the different textures of bark with this simple and colorful craft.*

## Materials:

- Crayons - peel off the wrappings
- White paper
- Trees
- Tape (optional)

## Instructions:

1. Find a tree in your backyard and place your paper against it. If you want, tape the paper in place (or have another person hold it).
2. Turn your crayon on the side, and rub it up and down the sheet. As you do so, you will pick up the texture of the bark on the paper. If there is any lichen growing on the tree, you should see that in your rubbing, too.
3. Label each tree you rub, and admire the variety!
